Introduction

We congratulate you on the acquisition of your Jaeger-LeCoultre watch, and thank you for your confidence in us.

We invite you to consult the operating instructions and hope your Jaeger-LeCoultre timepiece brings you great enjoyment.

Accuracy and precautions for use

Manually-wound or automatic mechanical watches

The precision of mechanical watches is determined by the balance. This oscillates at a rate of 28,800 vibrations per hour.

Despite all the care that the master watchmakers of the Jaeger-LeCoultre Manufacture have lavished on building and assembling your watch, its accuracy is subject to the influence of gravity, magnetic fields, impacts and ageing of the oils. The precision of a watch is measured by its regularity of rate in various positions.

Your individual temperament and your activities could be the cause of slight irregularities. If you observe a discrepancy in the running of your watch, we advise you to entrust it to an authorised Jaeger-LeCoultre retailer who will make the necessary adjustments. Watches with mechanical movements must not be used for sports involving significant risk of impact or abrupt actions, such as golf or tennis for example.

Water resistance

Your Jaeger-LeCoultre watch is water-resistant to 5 bar/atm. The water resistance of your watch is identifiable by the symbol engraved on the back. This means that your timepiece has been tested at an overpressure of 5 bar, corresponding to an immersion pressure of 50 metres (1 bar/atm = approx. 10 metres).

In accordance with the ISO 22810/NIHS 92-20 standard, in order to guarantee the durability of the watch's characteristics over time and as the water resistance may be affected by certain activities, it is recommended that the user:

- have the water resistance of the watch checked by an authorised Jaeger-LeCoultre dealer, in accordance with the recommendations of the Jaeger-LeCoultre Manufacture and at any event after each opening of the case, in which case it is recommended that the test be carried out with increased air pressure

- check when making the purchase that the strap or bracelet is suitable for the intended use
- avoid subjecting the watch to excessively abrupt temperature changes
- protect the watch from being dropped or suffering other shocks (have the watch checked after any violent impact)
- avoid the use of the controls, push-piece or time-setting crown while under water or before the watch has dried after immersion
- restore the time-setting crown and the push-pieces to their normal positions (or, where applicable, close the compression key) after every manipulation
- rinse the watch with fresh water after use in sea water.

You may use your watch during short swims, and when jumping in from the edge of a swimming pool but not from a diving board. Your watch must not be used for scuba diving or for sports involving significant risk of impact, such as windsurfing or water-skiing. Also note that leather straps are not suited to aquatic activities.

Furthermore, it is vital to have the water resistance of your watch checked by an authorised Jaeger-LeCoultre retailer at least once every two years, and at any event before any period during which it is liable to undergo prolonged and/or regular immersions.

"1000 Hours Control" test

Jaeger-LeCoultre submits all its watches to the stringent "1000 Hours Control", a unique battery of comprehensive and rigorous internal tests lasting a full 1000 hours.

The "1000 Hours Control" seal or legend placed or engraved on the back of your watch certifies that the latter has undergone this programme of observation in our laboratories and has successfully passed all the tests relating to regularity of rate, temperature, atmospheric pressure and resistance to shocks and magnetic fields, as well as water resistance trials. Your watch is thus capable of withstanding the daily stresses and strains that await it when worn on your wrist.

The criteria of the "1000 Hours Control" programme considerably exceed the standards of official timing tests, which deal only with part of the movement.

Jaeger-LeCoultre tests not only the movement prior to being cased up in the watch, but also the watch as a whole.

Technical specifications

- Manually-wound mechanical movement, Jaeger-LeCoultre Calibre 383 Dual-Wing.
- 28,800 vibrations/hour.
- Power-reserve: approximately 50 hours.
- Power-reserve of second time zone: approximately 50 hours.
- Water-resistance: Water-resistant to 5 atm.

Movement

Jaeger-LeCoultre Calibre 383.

Important note regarding the power-reserves of the Calibre 383 Dual-Wing.

The Dual-Wing movement of the Duomètre Unique Travel Time watch model comprises two barrels. The first barrel provides a 50-hour power-reserve for the watch's time function. The second barrel, independently of the first, provides a 50-hour power-reserve for the second time zone. The functions thus do not cause any loss of energy or isochronism in the escapement. The power-reserve for the time function can be read on the hand between 4 and 5 o'clock. The power-reserve for the second time zone can be read on the hand between 7 and 8 o'clock.

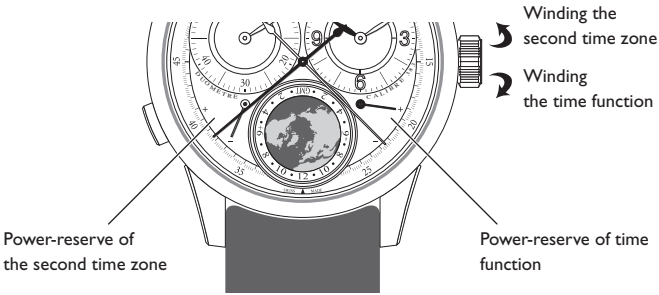

In both cases, the power-reserve is at its maximum when the hand is positioned opposite the "+" symbol. As energy is consumed, the hand will gradually point towards the "-" symbol. When the hand is opposite the "-" symbol (after approximately 50 hours), this indicates that the power reserve has been exhausted. This is the last chance to wind up the watch without losing the settings.

Both barrels can be wound using crown A, in position 1.

By turning the crown clockwise, you wind up the second time zone (and therefore restore its power-reserve). By turning the crown anti-clockwise, you wind up the time function barrel (and therefore restore its power-reserve).

Important:

Although the two power-reserves are independent, it is vital that both are wound before the timepiece can be used. If one of the power-reserves is depleted, the movement will stop (no damage will be caused to the movement). It will thus be necessary to wind the two power-reserves according to the instructions to restart the calibre.

Functions

The Duomètre Unique Travel Time is the first world time watch in which the second time zone can be set to the minute.

Thanks to the Dual Wing concept, which enables the addition of functions without disrupting the power supplied to the regulating organ, the second time zone of your Duomètre Unique Travel Time does not lead to energy loss.

Consequently, the Duomètre Unique Travel Time displays the following:
- The hours, minutes and second of the time where you live (local time)
- The hour, minute and day/night GMT indicator of the city selected for the second time zone.
- The power-reserves which enable the winding levels to be controlled.

Use

Starting the watch

Crown in position 1

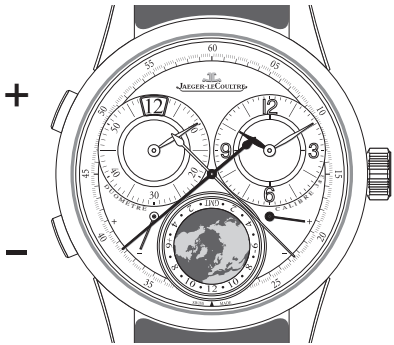

The watch can be started by turning the crown clockwise to wind on the barrel of the second time zone and anti-clockwise to wind that of the reference time. The watch is fully wound when the two power-reserve hands reach the "+" symbol. There is no stop to tell you that the movement has been fully wound, as excess winding is absorbed by a slipping spring. This prevents damaging the going train.

Setting the time

Adjusting the globe position and indication of the 24-hour time zones

- The globe and the time zones are connected, enabling the globe and time zone indication to be moved with the aid of the two push-pieces.
- These are based on the time zone of reference (the main time zones are visible on the back of the piece). They can be aligned to the hour marker which is found at 6 o'clock.

Setting the reference time

Crown in position 3

- The movement is then locked ("stop seconds" function). To enable time setting accurate to one second, stop the time function seconds hand (gold or rhodium plated-hand) at 60.
- Move the hands forward clockwise to the desired time and, on the hour signal, push the crown back to position 1. The watch starts running again.

Setting the second time zone as the reference time

Crown in position 2

- Rotating the crown moves the minute hand of the second time zone forward by intervals of 1 minute at a time. To move through the hours more rapidly, it is possible to move the minute hand back and forth above the hours disk, which causes the disk to move forward by one hour.
- Align the time of the second time zone with the reference time.
- Make sure to respect the day/night indication on the globe.

The destination time is now ready for setting.

Setting the second time zone

'Standard' time zone

Crown in position 1

- Adjust the time at your desired destination using the push-pieces. Press once on the upper push-piece to move the second time zone forward by one hour. Press the lower push-piece once to move the time of the second time zone back one hour. The watch is set and ready for wearing.

Half hour time zones

Crown in position 1

- Adjust the time at your desired destination using the push-pieces. Press once on the upper push-piece to move the second time zone forward by one hour. Press the lower push-piece once to move the time of the second time zone back one hour. Set the time zone up to GMT+5.

Crown in position 1

- Use the crown to change the minutes and advance by 30 minutes
- The watch is set and ready for wearing.

Jaeger-LeCoultre watches

In order to benefit from the International Guarantee and/or the Limited Guarantee and/or the Manufacturer's Guarantee for Australia, Jaeger-LeCoultre products must be purchased exclusively from authorised Jaeger-LeCoultre retailers or from Jaeger-LeCoultre Boutiques. Maintenance and repair work must be entrusted to an authorised Jaeger-LeCoultre retailer, or a Jaeger-LeCoultre Boutique or an authorised Jaeger-LeCoultre Service Centre. If these conditions are not met, the manufacturer's guarantee does not apply. Please contact Jaeger-LeCoultre to obtain the list of authorised Jaeger-LeCoultre retailers all over the world.

International Guarantee

The International Guarantee applies to Jaeger-LeCoultre products sold or presented for guarantee repairs in all countries, except the United States of America and Canada (for these two countries, see the Limited Guarantee) and Australia (for this country, refer to the Guarantee for Australia).

Terms and conditions of the Jaeger-LeCoultre International Guarantee

Your Jaeger-LeCoultre watch is guaranteed against all manufacturing defects for two years from the date of purchase, subject to the following conditions.

Any part found by our technical services to be defective as a result of a manufacturing defect will, at the sole discretion of Jaeger-LeCoultre, be repaired or replaced free of charge. The Jaeger-LeCoultre International Guarantee is valid only if the guarantee certificate enclosed with this booklet has been duly completed, dated, stamped and signed by the authorised Jaeger-LeCoultre retailer or the Jaeger-LeCoultre Boutique who sold you your watch.

This Jaeger-LeCoultre International Guarantee does not cover defects resulting from accidents, mishandling or incorrect or abusive use (for example, knocks, dents, crushing, excessive temperatures, powerful magnetic fields), the use of or effect of using batteries other than those designated by Jaeger-LeCoultre, unauthorised alteration or repair or the consequences of normal wear and ageing of the watch, the strap or the glass, the loss of water-resistance after two years from the date of purchase if your watch is water-resistant, or any defect resulting from contact with water if your watch is not water-resistant.

Jaeger-LeCoultre water-resistant watches may be identified by the symbol  engraved on the back. Their water-resistance is guaranteed for two years from the date of purchase, provided that the glass, the bezel, the back, the middle

part and the crown have not been damaged. It is nevertheless essential to have the water-resistance of your watch checked at least once every two years, and in any event, prior to any period of intensive use, either by an authorised Jaeger-LeCoultre retailer or by a Jaeger-LeCoultre Boutique or by an authorised Jaeger-LeCoultre Service Centre (for further information please see your User Manual).

For quartz watches, this guarantee does not cover the battery life.

As a consumer, you may have legal rights under applicable national legislation governing the sale of consumer goods; those rights are not affected by this guarantee.

Limited Guarantee (United States of America and Canada)

The following Limited Warranty applies to Jaeger-LeCoultre products sold or presented for warranty repairs in the United States of America and Canada only.

Terms and conditions of the Jaeger-LeCoultre Limited Warranty

Your Jaeger-LeCoultre watch is guaranteed against all manufacturing defects for two years from the date of purchase, subject to the following conditions.

Any part found by our technical services to be defective as a result of a manufacturing defect will, at the sole discretion of Jaeger-LeCoultre, be repaired or replaced free of charge. The Jaeger-LeCoultre Limited Warranty is valid only if the warranty certificate enclosed with this booklet has been duly completed, dated, stamped and signed by the authorised Jaeger-LeCoultre retailer or the Jaeger-LeCoultre Boutique who sold you your watch.

This Jaeger-LeCoultre Limited Warranty does not cover defects resulting from accidents, mishandling or incorrect or abusive use (for example, knocks, dents, crushing, excessive temperatures, powerful magnetic fields), the use of or effect of using batteries other than those designated by Jaeger-LeCoultre, unauthorised alteration or repair or the consequences of normal wear and ageing of the watch, the strap or the glass, the loss of water-resistance after two years from the date of purchase if your watch is water-resistant, or any defect resulting from contact with water if your watch is not water-resistant.

Jaeger-LeCoultre water-resistant watches may be identified by the symbol  engraved on the back. Their water-resistance is guaranteed for two years from the date of purchase, provided that the glass, the bezel, the back, the middle part and the crown have not been damaged. It is nevertheless essential to have the water-resistance of your watch checked at least once every two years, and in any event, prior to any period of intensive use, either by an authorised Jaeger-LeCoultre retailer or by a Jaeger-LeCoultre Boutique or by an authorised Jaeger-LeCoultre Service Centre (for further information please see your User Manual).

For quartz watches, this guarantee does not cover the battery life.

Except insofar as prohibited by applicable law, this Limited Warranty shall be the exclusive manufacturer warranty. Neither this Limited Warranty nor any other warranties, whether expressed or implied, including, but not limited to,

any implied warranty of merchantability or of fitness for any particular purpose, shall extend beyond the period of two years from the date of purchase.

The liability of Jaeger-LeCoultre is limited solely and exclusively to repair or replacement under the terms and conditions stated herein. Jaeger-LeCoultre shall not be liable, by virtue of this Limited Warranty or otherwise, for any loss or damage arising out of the use of or inability to use this watch nor for any incidental or consequential damages relating in any way to this watch.

Some States, Provinces and Territories do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you.

This Limited Warranty grants you specific legal rights, in addition to which you may have other legal rights that vary from one Country, State, Province or Territory to another.

Guarantee for Australia

This Guarantee for Australia applies to Jaeger-LeCoultre products sold or presented for guarantee repairs in Australia only.

Terms and conditions of the Jaeger-LeCoultre Guarantee for Australia

Mandatory Statutory Rights. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure.

Jaeger-LeCoultre Guarantee. This Jaeger-LeCoultre Guarantee gives you additional rights provided by Jaeger-LeCoultre. Every Jaeger-LeCoultre product is made and tested to meet the Jaeger-LeCoultre quality standards. Nevertheless, should your Jaeger-LeCoultre product prove defective, please contact the Jaeger-LeCoultre retailer or the Jaeger-LeCoultre Boutique indicated on your guarantee certificate; only authorised Jaeger-LeCoultre retailers or Jaeger-LeCoultre Boutiques are entitled to provide guarantee service as defined in this Jaeger-LeCoultre Guarantee. In order to benefit from this guarantee you will be required to present this Jaeger-LeCoultre guarantee certificate duly completed, dated, stamped and signed by an authorised Jaeger-LeCoultre retailer or by a Jaeger-LeCoultre Boutique.

This Jaeger-LeCoultre Guarantee covers defects of materials or workmanship of your Jaeger-LeCoultre product. Jaeger-LeCoultre will remedy these identified defects free of charge for up to two (2) years from the date of purchase. Thereafter, Jaeger-LeCoultre will repair any defective product or part subject to a service charge. The Jaeger-LeCoultre Guarantee does not cover defects and damage caused by accident, improper use (including knocks, dents, crushing, etc.), normal wear or tear, alteration, dismantling or repair by persons other than authorised Jaeger-LeCoultre repair specialists or the use of components other than those recommended by Jaeger-LeCoultre, watches with the serial number removed or the strap or glass altered, the loss of water resistance after two years after the date of purchase if your watch is water-resistant, and any defect resulting from the contact with water if your watch is not water-resistant.

Jaeger-LeCoultre water-resistant watches may be identified by the symbol  engraved on the back. Their water resistance is guaranteed for two years from the date of purchase, provided that the glass, the bezel, the back, the middle part and the crown have not been damaged. It is essential to have the water resistance checked by an authorised Jaeger-LeCoultre retailer, a Jaeger-LeCoultre Boutique or an authorised Jaeger-LeCoultre Service Centre at least every two years, and in any event, prior to any period of intensive use. Please refer to the operating instructions for further details.

For quartz watches, this guarantee does not cover the battery life.

Jaeger-LeCoultre Customer Service

A Jaeger-LeCoultre timepiece is a high-precision instrument that operates 24 hours a day, or 8,760 hours a year. It is therefore essential to have it serviced once every three years in order to guarantee its good working order and its durability. If significant variations occur in the settings, it may be necessary to have the movement serviced.

It is also necessary to have the water-resistance of the watch checked once every two years, or prior to any period during which it will be subjected to prolonged and/or regular immersion.

Maintenance and repair work must be entrusted to an authorised Jaeger-LeCoultre retailer, or to a Jaeger-LeCoultre Boutique or authorised Jaeger-LeCoultre Service Centre. The list of our points of sale and service centres is available on our website: www.jaeger-lecoultre.com. You will also find this information at the end of this document, under the heading "Where to entrust my timepiece for maintenance?"

Our authorised Service Centres are staffed by watchmakers trained at the Jaeger-LeCoultre Manufacture, and have the workshops, tools and parts required for the repair and maintenance of Jaeger-LeCoultre watches and clocks.

In certain cases, especially for operations requiring special tools and parts, the Service Centres will send your watch to the Jaeger-LeCoultre Manufacture in Switzerland to have the necessary work carried out.
